Product & Technical Updates

QIAGEN is delivering assay and analysis solutions supporting SARS-CoV-2 Research

Sequence the whole viral genome with QIAseq SARS-CoV-2 Primer Panels to support epidemiological studies

Unbiased solutions for studying the metagenomics of SARS-CoV-2 using QIAseq FastSelect and RNA Seq Solutions

Unlock Insights with QIAGEN CLC Genomics Workbench and Ingenuity Pathway Analysis

Sample to Insight QIAGEN related approaches for SARS-CoV-2 WGS 30

Qiagen Solutions Supporting SARS-CoV-2 Research

QIAGEN has launched the **QIAseq SARS-CoV-2 Primer Panel**, a multiplexed PCR primer set for whole-genome amplification of the novel Coronavirus, SARS-CoV-2. Using the ARTIC V3 primers described here, the QIAseq SARS-CoV-2 Primer Panel separates 400 amplicons into two PCR pools that together cover the entire SARS-CoV-2 genome.

Get a **trial kit** of the new QIAseq SARS-CoV-2 Primer Panel with every purchase of QIAseq DX DNA Library Kit now.

QIAGEN CLC Genomics ProSuite and QIAGEN Ingenuity Pathway Analysis

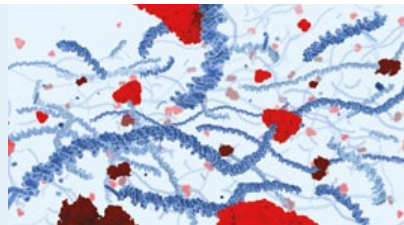

QIAGEN CLC Genomics Workbench software is used by hundreds of microbiology and virology labs around the world for basic research and infectious disease epidemiology.

QIAGEN Ingenuity Pathway Analysis (IPA) is used by thousands of researchers worldwide and cited extensively in studies of the host response to viruses.

Ordering Information:

- Cat No./ID: 180473 QIAseq FX DNA Library Kit (24)
- Cat No./ID: 180475 QIAseq FX DNA Library Kit (96)
- Cat No./ID: 832023 CLC Genomics ProSuite
- Cat No./ID: 830018 IPA Analysis Match NUL

[Request Your Free Trial Kit Now](#)

Publication of ARTIC primers

Published data of ARTIC primers with QIAseq FX DNA Library preparation.

BIOSEARCH™ TECHNOLOGIES
GENOMIC ANALYSIS BY LGC

2019-nCoV CDC-qualified Kits
We now offer SARS-CoV-2 probe and primer kits with specifications that match US CDC assay design and manufacturing requirements.

Lending a helping hand
A unified portfolio from an expert in genomic analysis. LGC, Biosearch Technologies.

GMP Oligos
Our ISO 13485:2016-certified cGMP production facility manufactures oligo components for molecular diagnostic assays and commercial kits.

Enabling Your RAPID RESPONSE to COVID-19

LGC, Biosearch Technologies supports these scientists on the front line of human healthcare with our custom manufacturing of components for (q)PCR- and NGS-based diagnostics. This includes oligo components and chemistries, ranging from sample preparation, primers, dual labelled BHQ and BBQ probes, enzymes and master mixes, to nucleic acid chemistries and consumables that are needed for oligo synthesis.

LGC, Biosearch Technologies are well-experienced in anticipating and mitigating risks of contamination, by implementing stringent processes to avoid cross-contamination between orders. This includes screening all orders involving oligonucleotides of certain lengths.

CIL Cambridge Isotope Laboratories, Inc.

Biomolecular NMR

Biomolecular NMR

Nuclear magnetic resonance (NMR) spectroscopy provides information regarding the structure and dynamics for protein, RNA and DNA at the atomic level. Over the years, advances in isotope-labeling strategies have expanded the size of macromolecules and the types of detailed information available for study.

Available Now:

- In vivo Protein Expression
- Sparse Labeling for Protein NMR
- Nucleic Acid Synthesis
- Methyl and Amino Acid Type Labeling
- Protein Standards
- Other Biomolecular NMR
- In situ Protein Expression
- Membrane Proteins
- Hyperpolarization/MRI/MRS

SPEX Sample Prep popular webinar

High-throughput Tissue Homogenization & Cell Lysis Using the Geno/Grinder & MiniG

Discusses how the Geno/Grinder and MiniG can be used for effective tissue homogenization and cell lysis for a range of different sample types. Applications include DNA/RNA extraction and pesticide residue extraction.

Build a powerful NGS variant interpretation solution with HGMD Professional

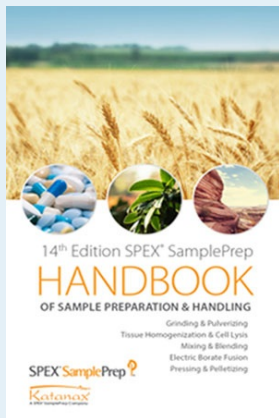

HGMD for NGS data interpretation webinar, 24th June, 09:00am

Power up your variant knowledge using the Human Gene Mutation Database (HGMD™) Professional.

Learn how to use the online interface and downloadable database, as well as how to use HGMD Professional and ANNOVAR to produce a powerful in-house variant interpretation solution.

Important Resources

FREE SPEX SamplePrep Handbook

To make the sample preparation process simple while increasing throughput, ensuring reproducibility and minimizing cross contamination.

- Tissue Homogenization and Cell Lysis
- Grinding and Pulverizing
- Mixing and Blending
- Borate Fusion
- Pressing and Pelletizing
